

Franklin Public Library Public Relations Policy

The Franklin Public Library Board of Trustees and the library staff take an active role in promoting the library throughout the community; endeavoring to inform all citizens about the various ways the library can enhance their activities; and encouraging their support of the library and its mission.

The library will cooperate as fully as possible with other community agencies and organizations in meeting the needs of the community, in so far as such cooperation is compatible with the library's mission, legal and fiscal considerations, and opportunity for staff involvement.

If it is necessary for the library to issue an official statement to the public or the media regarding library policy, procedure, or service the Library Director and the Board of Trustees must approve such statements.
